Venue: Herzogssaal in the heart of the old town
Live Surgery: Transmission from the „Finesse Center for Facial Plastic Surgery“

Endonasal Rhinoplasty State of the Art 2020 The Regensburg Course

Dear Colleagues and Friends:

The world of rhinoplasty seems to experience an important shift back towards endonasal approaches. After the great success of the New York City Symposium in December 2018, we are proud to present the first major scientific event solely dedicated to endonasal rhinoplasty in Europe. We are honored to include globally recognized experts in the program.

For this very special conference, the topics will focus on a patient centered approach. The central theme will be: What is it that the patient desires? How do we achieve the best, naturally pleasing results with the least intervention possible. Topics will include strategies to

- achieve naturally appearing results
- maximize patient comfort
- reduce postoperative recovery
- utilize local anaesthesia or sedation
- minimize tissue dissection and graft harvest

Endonasal techniques will be discussed in depth in the light of current controversies. Attention will be given to possibilities, new frontiers and strategies to overcome limitations of the endonasal approach.

Basic and advanced concepts in endonasal rhinoplasty will be presented to training surgeons and to those who would like to add endonasal techniques to their established open rhinoplasty spectrum.

Regensburg, is one of Germany's most wonderful medieval towns, relaxing yet vibrant. The town is located close to Munich. Travel is easy to Munich airport, and hotel accommodation is affordable.

Share the enthusiasm of over 1500 colleagues who have attended the past Regensburg conferences and be part of an outstanding experience.

Please join us for this unique event and enjoy the beauty of our city and a wonderful social program.
